

Publishing Your CLASSIC Site in 4 Steps:

If you created a “Classic” Site:

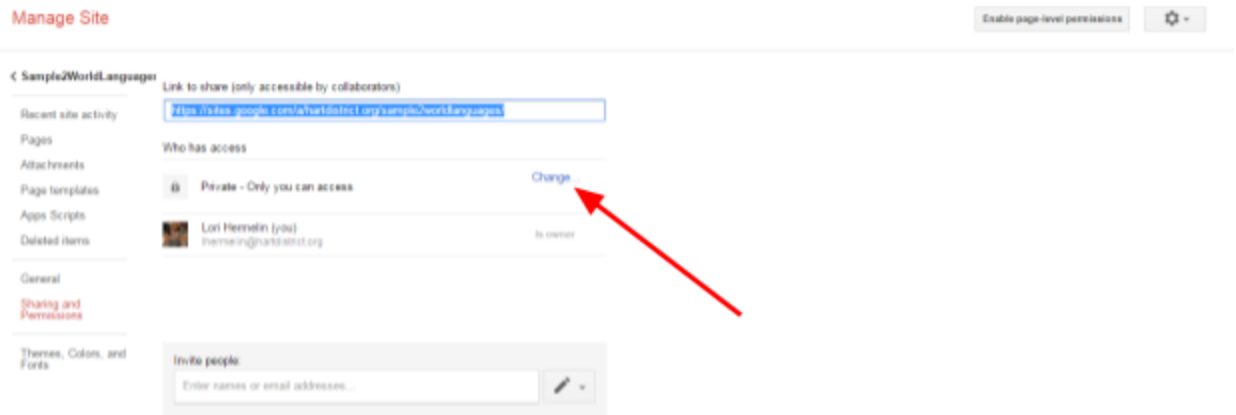

Your site was named when you created it...

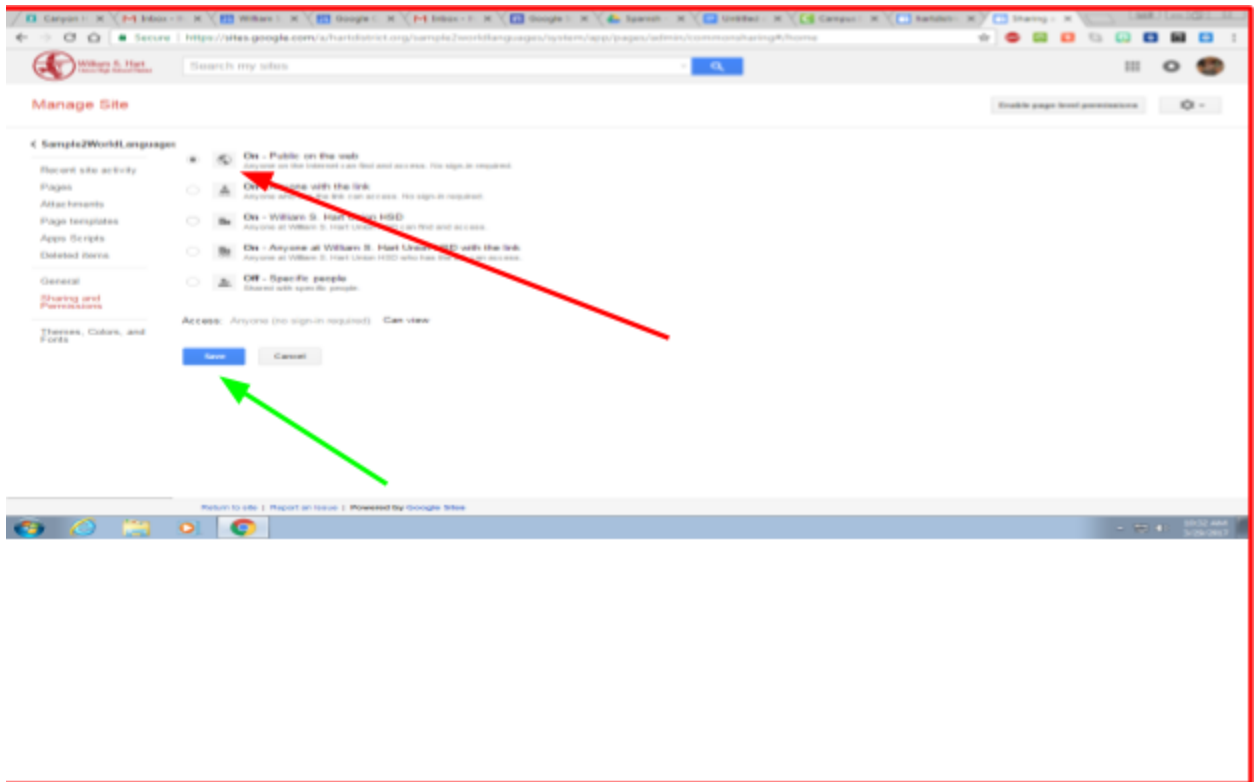

1. In the top right click SHARE.

2. Change the sharing permissions from “Private only to me”

3. Change the permissions to “Anyone with the link and Save”

4. Copy the link and use that in the Google form.

The screenshot shows the Google Sites administration interface for a site named "Sample2WorldLanguage". The browser's address bar displays the URL: <https://sites.google.com/a/hartsdist.org/sample2worldlanguage/system/app/pages/admin/commonsharing#/home>. This URL is highlighted in blue and circled in red. The page title is "Manage Site". On the left, there is a navigation menu with options like "Recent site activity", "Pages", "Attachments", "Page templates", "Apps Scripts", "Deleted items", "General", "Sharing and Permissions", and "Themes, Colors, and Fonts". The "Sharing and Permissions" section is active, showing the site is "Public on the web - Anyone on the Internet can find and view". Below this, there is an "Invite people" section with a text input field for entering names or email addresses.
